Map of AED Location (circled in green)

Conference Safety Topic
Working together, MDOT and the heavy construction industry are advancing our culture and practices to put SAFETY FIRST in Michigan’s work zones.
As a partnership between MDOT and the heavy construction industry in Michigan, work together to advance the effort of looking at ways to go above and beyond the current mode of operations to make work zone safety an even greater aspect of our culture.

Set direction and enable implementation of recommendations.

Ensure the timely closure of issues.

Be the catalyst for changing culture.

Help to remove barriers to implementation; provide suggestions for other options.
